

Company Policy

Laulagun Bearing adopts an Integrated Quality, Environmental and Occupational Health and Safety Management System as a means of ensuring:

- Compliance with legal requirements, as well as other requirements that we enter into with our stakeholders.
- Stable results over time, based on continuous improvement.
- Our commitment to safe and healthy working conditions, and the elimination of hazards and reduction of risks to people's safety and health.
- Promotion of consultation and participation of all our workers in health and safety matters.

This Policy is reviewed annually to adapt it to the evolution of our context, the market and legal requirements.

Our mission is to apply engineering to the design and manufacture of bearings, achieving mechanical turning solutions for large loads, accompanying our customers in the long term and helping them achieve their goals. We want to be a global, flexible and consistent quality supplier, developing innovative products and providing turning system solutions for leading customers in technology sectors.

To this end, the following values are disseminated and promoted in our organization:

- Ethics
- Respect for people
- Social Responsibility
- Customer Orientation
- Teamwork
- Commitment to quality
- Environmental protection and pollution prevention
- Philosophy of Continuous Improvement
- Innovation
